

Poola Ramesh

Senior Quality Engineer

Address Bengaluru, Karnataka
560036

Phone +91 - 6301806575

E-mail ramesh.g1131@gmail.com

Quality Assurance Engineer with **8.8 years of experience** in manual and automation testing across web and mobile applications. Skilled in **Playwright with TypeScript** for scalable test automation, **CI/CD with Jenkins**, and leveraging **GitHub Copilot** for efficient test development. Strong expertise in **API testing**, functional and regression testing, and **performance testing with J-Meter**. Limited but growing exposure to **database and memory testing**, with a focus on expanding skills in these areas.

Core Competencies

- Testing & QA Expertise: Functional, Regression, System Integration, Smoke, Exploratory, Automation Testing, API, UI/UX, Mobile, Web, Non-functional (Performance & Memory)
- Methodologies: Agile Scrum, Shift Left Testing, SDLC & STLC
- Soft Skills: Communication, Collaboration, Problem Solving, Adaptability, Time Management, Stakeholder Management, Team Leadership
- Additional Skills: Test Planning, Test Case Design, Defect Triage, UAT Support, Knowledge Transfer, Mentoring Junior QA, Leading QA Initiatives, Cross-functional Coordination
- Testing Tools: Azure DevOps (ADO), JIRA, ServiceNow, VS Code
- Reporting & Documentation: Excel Dashboards, PowerPoint Reports
- Methodologies: Agile Scrum, SDLC, STLC
- Testing Types: Functional, Regression, Integration, Smoke, Exploratory, API, UI/UX, Mobile, Web, Performance & Memory Testing

- Automation: Playwright, Type script, Exposure in Cypress, Java script, Page Object Model, CI/CD Concepts, Cross-Browser Testing, Python, Pytest, Test Data & Reporting Practices
- Soft Skills: Communication, Collaboration, Problem Solving, Adaptability, Time Management, Stakeholder Management, Team Leadership

Work Experience

Feb 2022 - IT QA Analyst

Current

Ecolab Global Services Pvt Ltd, Bengaluru

- Spearheaded manual testing initiatives following Shift Left Testing Strategy, detecting defects early and reducing production issues.
- Analyzed business requirements, designed test scenarios, authored, and executed test cases within sprint timelines, adhering to QA policies and documentation standards.
- Contributed to automation planning discussions by identifying regression and smoke test scenarios suitable for automation initiatives.
- Developed and executed automated test scripts, improving testing efficiency and reducing manual errors.
- Worked on automation framework concepts including POM, Playwright Type script and CI/CD integration Jenkins practices as part of QA process improvements.
- Participate in all Scrum ceremonies, including Sprint Planning, Review, Retrospective, and client demo calls to present validated requirements.
- Conducted functional, integration, system, regression, smoke testing, ensuring comprehensive coverage across applications.
- Led UAT defect triage calls, collaborating with cross-functional teams to resolve issues & maintain high-quality deliverables.
- Mentored junior QA analysts and coordinated offshore QA teams to ensure smooth testing operations and knowledge transfer.
- Initiated and led QA improvement initiatives, enhancing test efficiency and defect management processes.

Nov 2020 - Dec 2021 Functional Test Engineer

- Dec 2021

Photon Interactive Pvt Ltd, Chennai

- Managed end-to-end testing lifecycle, including requirement analysis, scenario design, test planning, and execution.
- Ensured E2E test coverage by aligning user stories with test cases in coordination with product managers.
- Supported production deployment cycles by validating functionality in web and mobile environments, contributing to smooth project rollouts.
- Guided junior team members in test execution and defect reporting, ensuring quality standards across the team.

Jan 2020 - Quality Engineer

Apr 2020

CAMSDATA TECHNOLOGIES, Bengaluru

- Executed test cases for e-commerce applications, maintaining strict SLA compliance.
- Collaborated with stakeholders in planning and execution in Agile environments.
- Coordinated QA activities across client-facing teams and optimized test/release cycles to ensure timely project delivery.

Oct 2019 - QA Analyst

Jan 2020

Zucitech Software Solutions Pvt. Ltd, Bengaluru

- Performed web and mobile testing for OTT platform applications.
- Coordinated with product owners and onshore Agile teams for sprint delivery.
- Executed test cases, documented defects, and participated in defect triage for timely resolution.
- Assisted in knowledge transfer and onboarding of junior QA members.

May 2016 - Test Engineer

Aug 2019

Sunfra Software Services, Bengaluru

- Conducted web and mobile application testing for e-commerce projects, ensuring functionality across multiple languages.
- Participated in exploratory testing and bug battles, identifying critical defects to enhance application quality.
- Mentored new team members and supported offshore teams in test execution, improving defect reporting accuracy.

Education

Apr 2014

Bachelor of Technology (B. Tech): Computer Science

JNTU Anantapur - Anantapur, Andhra Pradesh, India

Key Projects

Ecolab Verified Delivery (Supply Chain) Executed end-to-end functional and system testing for a delivery verification app, ensuring alignment with business requirements across QA, UAT, and production environments. Validated app functionality for multiple digital checkpoints from truck loading to delivery, enhancing operational efficiency., Bath & Body Works (E-Commerce) Conducted testing for web-based e-commerce platform, verifying product listings, transactional workflows, and user experience to meet global retail standards., OLX (E-Commerce) Performed functional, UI, and mobile testing for a leading online marketplace, ensuring smooth user transactions, listings, and delivery processes.
